A

abstracts
JFS, (2)90; (4)182; (6)106; (8)102; (10)117; (12)91
acid, amino
equations predict PER from analysis, (7)34
acid, linoleic
grapeseed oil as a rich source of, (5)58
additives, food
GRAS substances: recent progress in flavoring ingredients, (9)76
KELTROL wins 1974 IFT industrial achievement award, (6)18
legalities concerning, (5)42
xanthan gum in protein-fortified starch bread, (6)23
aids for food technologists
see ingredients; laboratory; packaging; plant; pollution control
alcoholic beverages
patents, (1)99; (2)87; (3)125; (4)169; (5)98; (6)101; (7)88; (9)115; (10)113; (11)111; (12)89
amino acid
equations predict PER from analysis, (7)34
analytical methods
instrument automates, accelerates nitrogen determination, (6)40
animal products
decreasing saturated fatty acid content of, (1)22
antioxidants
hemoglobin peroxidation tests for screening, (10)60
ascorbate
stability of in bacon, (5)28
awards, IFT
Appert, Nicholas: G.F. Stewart, (7)16
Babcock-Hart: B.S. Schweigert, (7)17
Cruess, Wm. V.: E.F. Stier, (7)18
industrial achievement: criteria questioned, (2)74; purpose, (2)74; 1974 award to Kelco Co., (6)18
international: H. Mitsuda, (7)17
Prescott, S.C.: T.W. Keenan, (7)18

B

bacon
stability of ascorbate in, (5)28
baked goods
patents, (1)96; (2)85; (3)123; (4)166; (5)96; (6)100; (7)87; (8)97; (9)112; (10)111; (11)108; (12)88
properties of whey protein concentrate foams, (3)40
baking
modeling and simulation of a multizone band oven (12)50
band ovens
multi-zone: modeling and simulation of, (12)50
beer and brewing materials
patents, (1)99; (2)87; (3)125; (4)169; (5)98; (6)101; (7)89; (8)99; (9)115; (10)113; (11)110; (12)89
sensory profiling of by a modified QDA method, (11)36
book reviews
(1)93; (2)80; (3)117; (4)173; (5)101; (6)90; (7)82; (8)94; (9)109; (10)96; (11)105; (12)86
bread
xanthan gum in protein-fortified, (6)23
by-product technology
patents, (1)99; (2)89; (3)126; (4)172; (5)100; (6)105; (7)90; (8)100; (9)116; (10)114; (11)113; (12)98

C

calories
rapid method for calculating energy values of food components, (7)29
can(s)
easy-open feature prevents bimetallic corrosion, (11)54
carbohydrates
effects of food processing on nutritive values: scientific status summary, (10)77
rapid method for calculating in food components, (7)29
carbon dioxide, liquid
pilot-plant extraction with, (6)32
cereal
milling characteristics of triticale, (11)66
patents, (1)96; (2)85; (3)123; (4)166; (5)96; (6)100; (7)87; (8)97; (9)112; (10)111; (11)108; (12)88
cleaning
of food, (2)34
of tomatoes using rotating rubber discs, (12)26
coatings
in food industry: requirements, application and regulatory concerns, (12)64
cocoa
patents, (1)98; (2)86; (3)125; (4)168; (5)98; (6)101; (7)88; (8)98; (9)114; (10)113; (11)110; (12)90
products: are microbiological quality standards workable, (10)21
coffee
patents, (1)98; (2)86; (3)125; (4)168; (5)98; (6)101; (7)88; (8)98; (9)114; (10)113; (11)110; (12)90
color
patents, (1)98; (2)88; (3)125; (4)169; (5)99; (6)101; (7)89; (8)99; (9)113; (10)113; (11)111; (12)90
computers
handling taste panel data by, (11)42
confectionery
patents, (1)97; (2)86; (3)124; (4)168; (5)97; (6)100; (7)88; (8)97; (9)114; (11)110; (12)89
consumer products, new
(1)75; (2)62; (3)86; (4)134; (6)61; (7)64; (8)72; (9)82; (10)74; (11)78
copyrights
protecting created proprietary interests of food scientists, (3)22
corrosion
bimetallic: easy-open can feature prevents, (11)54
coatings for the food industry, (12)64
economics, (12)68
introduction to food industry, (12)54
materials for food industry, (12)60
costs
corrosion economics, (12)68

D

dairy industry
in-plant control of fluid wastes in, (6)50
dairy products
patents, (1)96; (2)84; (3)123; (4)165; (5)95; (6)99; (7)86; (8)96; (9)112; (10)111; (11)108; (12)87
developing countries
food acceptance and flavor require-

ments in, (11)48
need food technology extension, (4)47
training food technologists for, (8)67
diet/diets
consortium publishes its guidelines for a national nutrition policy, (7)20
decreasing saturated fatty acid content of animal products, (1)22
designing new American nutritional patterns, (1)17
developing foods for cardiac-concerned: Symposium, (1)16
diet foods in the food service industry, (1)26
for cardiac concerned: economic considerations, (1)20
for cardiac concerned: recommendations for food industry action, (1)32
for cardiac concerned: what? why? how? (1)16
formulating foods for the cardiac concerned, (1)22
FPC as a mineral nutrient source, (3)58
government regulations for prudent diet foods, (1)28; (1)30
health, organic and natural foods, (2)50
nutrification of frozen preplated lunches is needed, (2)52
nutritional analysis of foods from fast food chains, (4)50
nutritional aspects of nutrient standard menus, (1)62
plant proteins: progress and problems, (3)31
role of fiber in, and its potential in disease prevention/treatment, (1)34
role of vanadium, nickel, silicon, fluorine, and tin in human nutrition, (1)38
supplementation of foods vs. nutrition education, (7)55
vegetable proteins in, (1)24

E

education
flexible options for food science majors, (4)74
news notes, (1)90; (3)104; (4)164; (9)99; (10)107; (11)98
nutrition vs. supplementation of foods, (7)55
obligations of educators in food science to industry, (4)58; (4)60
real vs. imaginary curricula, (4)68
structured vs. unstructured curricula, (4)70
student chapters: requirements, activities and role in IFT, (9)18
teaching basic scientific knowledge, (4)67
training food technologists for developing countries, (8)67
egg products
patents, (1)96; (2)84; (3)123; (4)165; (5)95; (6)99; (7)86; (8)96; (9)112; (10)110; (11)108; (12)88
emulsifiers
KELTROL wins 1974 IFT industrial achievement award, (6)18
epidemiology
microbiological food hazards today —based on epidemiological information, (9)52
equipment
cleaning of tomatoes using rotating rubber discs, (12)26
lye peeling of tomatoes using rotating rubber discs, (12)38
patents, (1)99; (2)89; (3)126; (4)172; (5)100; (6)102; (7)90; (8)100; (9)116; (10)115; (11)112; (12)97
errata
(1)89; (9)104; (12)83
extraction
with liquid CO_2: pilot-plant studies, (6)32

F

fats
effects of food processing on nutritional values: scientific status summary, (10)77
rapid method for calculating in food components, (7)29
fatty acids, saturated
decreasing content of in animal products, (1)22
FDA
how it uses HACCP, (9)49
feeds
patents, (1)99; (2)89; (3)126; (4)172; (5)100; (6)105; (7)90; (8)100; (9)116; (10)114; (11)113; (12)98
fiber
in diet and potential in disease prevention/treatment, (1)34
fish products
patents, (1)96; (2)84; (3)123; (4)165; (5)95; (6)99; (7)86; (8)96; (9)112; (10)110; (11)108; (12)87
flavor(s)
patents, (1)98; (2)88; (3)125; (4)169; (5)99; (6)101; (7)89; (8)99; (9)113; (10)113; (11)111; (12)90
requirements and food acceptance in developing world, (11)48
flavorings
GRAS substances: recent progress in, (9)76
flour
milling characteristics of triticale, (11)66
fluorine
role in human nutrition, (1)38
foams
whey protein concentrate: properties of, (3)40
food additives
patents, (3)126; (4)171; (5)99; (6)102; (7)89; (8)100; (9)114; (10)114; (11)112; (12)90
food industry
air as a substitute for water in food processing, (2)40
coatings and linings: requirements, applications and regulatory concerns, (12)64
computer handling of taste panel data, (11)42
consortium publishes its guidelines for a national nutrition policy, (7)20
corrosion economics, (12)68
electrocoagulation clarifies food wastewater, (2)18
exhibitors—IFT food expo, (4)106
extracellular microbial polysaccharides: new hydrocolloids, (5)34
food acceptance and flavor requirements in the developing world, (11)48
HACCP concept and microbiological hazard categories, (9)30
how FDA uses HACCP, (9)49
introduction to corrosion, (12)54
is government research meeting its needs? (4)38
materials for, (12)60
microbiological critical control points in canned foods, (9)46
microbiological critical control points in frozen foods, (9)37
microbiological foods hazards today—based on epidemiological information, (9)52
moral, ethical and legal aspects of the food scientists responsibilities, (3)16
news, (1)85; (2)70; (3)102; (4)78; (5)82; (6)76; (7)78; (8)86; (9)101; (10)108; (11)92; (12)80
obligations of educators in food science to, (4)58
packaging's indispensable role in, (8)35
processing with chlorinated solvents, (2)25
recommendations for action re diet/nutrition of cardiac concerned, (1)32
role of the regulatory in setting microbiological quality standards, (10)42
sensory evaluation by magnitude evaluation, (11)16
sensory evaluation by QDA, (11)24
setting microbiological limits in, (10)34
training food technologists for developing countries, (8)67
who will pay for microbiological quality standards, (10)48
food processing
effects on nutritional values: scientific status summary, (10)77
GRAS substances: recent progress in flavoring ingredients, (9)76
HACCP concept and microbiological hazard categories, (9)30
microbiological critical control points in canned foods, (9)46
microbiological critical control points in frozen foods, (9)37
microbiological food hazards today —based on epidemiological information, (9)52
food science
flexible options for food science majors, (4)74
obligations of educators in, to industry, (4)60
obligations of educators in, (4)58
real vs. imaginary curricula, (4)68
structured vs. unstructured curricula, (4)70
teaching basic scientific knowledge, (4)67
food service industry
nutritional analysis of foods from fast-food chains, (4)50
prudent diet foods in, (1)26

food technologists
in legal land: problems, (3)26
protecting created proprietary interests of, (3)20
responsibility to the law, (3)16
role in government regulations involving food safety, (3)22
food technology
developing countries need extension of, (4)97
packaging protection for oxygen-sensitive products, (8)50
packaging's indispensable role in, (8)35
training of for developing countries, (8)67
food(s)
acceptance and flavor requirements in the developing world, (11)48
air as a substitute for water in processing of, (2)40
are microbiological quality standards workable, (10)23
cleaning of, (2)34
computer handling of taste panel data, (11)42
effects of processing on nutritional value: scientific status summary (10)77
equations predict PER from amino acid analysis, (7)34
foodborne microorganisms: radiometry and microcalorimetry for rapid detection of, (10)52
formulation of, for cardiac-concerned, (1)22
FPC as a mineral nutrient source, (3)58
Handbook No. 8 and nutrition labeling, (1)46
health, organic and natural: what they are and why attractive, (2)50
how FDA uses HACCP, (9)49
legalities concerning additives, (5)42
microbiological critical control points in canned, (9)46
microbiological critical control points in frozen, (9)37
microbiological hazards today—based on epidemiological information, (9)52
mixture designs applied to new formulations of, (3)50
modeling and simulation of a multizone band oven, (12)50
nutrification of frozen preplated school lunches is needed, (2)52
nutrition labeling: scientific status summary, (7)43
nutritional analysis of foods from fast-food chains, (4)50
organic: scientific status summary, (1)71
oxygen-sensitive: packaging protection for, (8)50
oxygen-sensitive: scavenger pouch protects, (8)63
packaging protection for oxygen-sensitive products, (8)50
phthalates in: scientific status summary, (3)75
pilot-plant extraction of liquid, with liquid CO_2, (6)32
plant proteins: progress and problems, (3)31
processed: storage retention of nutrients in frozen, canned, dried, and concentrated, (1)50
processing with chlorinated solvents, (2)25
rapid method for calculating energy values of components, (7)29
reducing surface oil content of fried products, (5)50
role of regulatory in setting microbiological quality standards, (10)42
role of vanadium, nickel, silicon, fluorine, and tin in human nutrition, (1)38
sensory evaluation by magnitude estimation, (11)16
sensory evaluation by QDA, (11)24
setting microbiological limits in the food industry, (10)34
shelf life: scientific status summary, (8)45
supplementation of vs. nutrition education, (7)55
who will pay for microbiological quality standards, (10)48
formulations, food
sensory evaluation by magnitude estimation, (11)16
sensory evaluation by QDA (11)24
forums in focus
(1)68; (3)106; (4)62; (6)56; (7)85
FPC (fish protein concentrate)
as a mineral nutrient source, (3)58
stabilized press cake for manufacturing of, (3)64
fruit drinks
patents, (2)87; (3)125; (4)169; (6)101; (7)89; (11)110; (12)89
fruits
patents, (1)98; (2)86; (3)124; (4)168; (5)97; (6)100; (7)88; (8)98; (9)114; (10)113; (11)110; (12)89

G

gelatin
are microbiological quality standards workable, (10)21
grapes
seed oil: as a source of linoleic acid, (5)58
GRAS (generally recognized as safe)
recent progress in flavoring ingredients under FDA, (9)76

H

HACCP (hazard analysis critical control point) concept and microbiological hazard categories, (9)30
how FDA uses, (9)49
microbiological critical control points in canned foods (9)46
microbiological critical control points in frozen foods, (9)37
heart disease
developing foods for cardiac-concerned (symposium): diets and food service industry, (1)26; diet foods government regulations, (1)28, 30; dietary aspects (1)16, 20; fatty acids, (1)22; food industry action, (1)32; formulating foods, (1)22; nutritional patterns, (1)17; vegetable proteins, (1)24
hemoglobin peroxidation
test for screening antioxidants, (10)60
honey
marketing through packaging, (3)77
hydrocolloids
extracellular microbial polysaccharides of interest to food industry, (5)34

I

IFT
achievement awards, 1974, winners, (7)16
achievement awards, 1975: call for nominations, (8)27; (9)72; (10)76
Appert, Nicholas award, 1974, (7)16
Babcock-Hart award for 1974, (7)17
Cruess, Wm. V. award for 1974 (7)18
divisional membership: is it for you, (6)15
expert panel on food safety and nutrition and CPI, (1)71, (3)75, (7)43, (8)45, (10)77
fellowships/scholarships, program for 1975–76, (12)24
fellowships/scholarships, recipients, (10)17
food expo exhibitors, (4)106
highlights of council and executive commitee meetings, 34th annual meeting, (9)9
highlights of executive committee meeting, Oct. 18, (2)14
IFTer statistics: education, age, membership, (4)14
IRS ruling on status of journal donations, (11)100
international award for 1974, (7)17
industrial achievement award: students question criteria, (2)74; purpose explained, (2)74
membership notice, (11)10
1974 financial summary, (9)10
1974 starting salary survey, (12)20
organic foods: scientific status summary, (1)71
packaging division: purpose, objectives, scope, goals, (12)16
photo highlights of 34th annual meeting, (8)28
plans for 1975 meeting, (7)7
Prescott, S.C. award for 1974, (7)18
president's message, (3)9, (4)9
previews: symposia and divisional programs, 34th annual meeting, (4)18
quality assurance division: history, goals, achievements, future, (10)20
receives two CESSE awards: outstanding accomplishment; award of merit, (11)9
regional section news, (1)10, (2)14; (3)12; (4)10; (5)10; (6)9; (7)12; (8)18; (9)16; (10)11; (11)10; (12)9
sixteen new fellows named, (8)9
student chapters: requirements, activities and role, (9)18
student division: objectives, benefits, membership, (11)14
35th annual meeting: call for contributed papers, (9)69
34th annual meeting: program in detail, (4)85
treasurer's message: your institute—under financial stress, (2)9

Advances in Food Research. Vol. 20. C.O. Chichester, E.M. Mrak, & G. Stewart, eds., (6)96

The Almanac of the Canning, Freezing, Preserving Industries. 59th ed. E.E. Judge, (12)86

Aspects Fondamentaux de la Lyophilisation Alimentaire. Palanche, B. Nutrica, (6)96

Baking Science and Technology. Vols. 1 & 2. E.J. Pyler, ed., (11)114

Cheese-Making Technology. M.E. Schwartz, (2)83

Chemical & Health. Report of Panel on Chemicals and Health of President's Science Advisory Committee, (6)94

Chemistry in the Economy. American Chemical Society Study, (5)106

Chronic Cassava Toxicity. B. Nestel & R. MacIntyre, eds., (3)117

Coffee Origin and Use. M. Sivetz, (12)86

Contract Foodservice/Vending. J.G. Gardner & J. Wilkinson, eds., (4)173

Cook/Freeze Catering—An Introduction to Its Technology. G. Glew, (3)121

Desiccants and Humectants. R.W. James, (2)82

The Directory of the Canning, Freezing, Preserving Industries. E.E. Judge, (8)94

Edible Gums and Related Substances. Food Technology Review No. 9. A.A. Lawrence, (3)117

Encyclopedia of Associations. Vol. 1. 8th ed. M. Fisk, (4)174

European Food Processing Industry 1973. 2nd ed. Noyes Data Corp. (3) 120

Fische und Fischerzeugnisse (Fish and Fish Products). W. Ludorff & V. Meyer, (5) 104

Food Analysis Laboratory Experiments. C.E. Meloan & Y. Pomeranz, (6)90

Food and the Consumer. A. Kramer, (5)105

Food and Man. 2nd ed. M.E. Lowenberg, E.N. Todhunter, E.D. Wilson, J.R. Savage, & J.L. Lubawski, (12)86

Food Composition Table for Use in East Asia and Selected Bibliography on East Asia Food Composition Table. W.T. Wu Leung, R.R. Butrum, & F.H. Chang, (7)83

Food Dehydration. Vol. 2. Practices and Applications. 2nd ed. W.B. Van Arsdel, M.J. Copley & A.I. Morgan, eds., (5)103

Food for Thought. T.P. Labuza, (9)109

Food Fundamentals. 2nd ed. M. McWilliams, (10)116

Food in History. R. Tannahill, (10)96

Food Oils and Their Uses. T.J. Weiss, (1)93

Food Science. 2nd ed. N.N. Potter, (6)94

Foodservice for the Extended Care Facility. L.H. Kotschevar & J. Wilkinson, eds., (3)120

Fundamentals of Dairy Chemistry. 2nd ed. B.H. Webb, A.H. Johnson & J.A. Alford, eds., (10)116

Gewürze (Spices). H. Melchior & H. Kastner, (10)124

Gewürze und Wurzstroffe, Sowie Ihre Anwendung Zur Herstellung Von Fleischwaren (Spices and Flavoring —and Their Use in Meat Products). U. Gerhardt. No. 9 in series "Fleischforschung und Praxis." (5)106

The Good Provider. H.J. Heinz and His 57 Varieties. R.C. Alberts, (3)119

Handbook of Chemistry and Physics. 54th ed. R.C. Weast, ed., (5)101

IFMA Encyclopedia of the Foodservice Industry. J. Woodman, (3)117

Increasing Productivity in Foodservice. R.B. Peddersen, A.C. Avery, R.D. Richard, J.R. Osenton & H.H. Pope, (5)104

Industrial Gums, Polysaccharides and Their Derivatives. 2nd ed. R.L. Whistler & J.N. BeMiller, (5)101

Industrial Uses of Cereals. Cereal Chemists, (10)96

Inspection Survey Guide for OSHA—A Self Inspection System. R.D. Gidel & P.F. Cestrone, (5)102

Instrumental Methods of Food Analysis. A.J. MacLeod, (2)81

International Symposium—Environmental Health Aspects of Lead. European Community Information Service, (2)82

Lists of Volatile Compounds in Foods (A Bibliography). 3rd ed. S. Van Straten & F. de Vrijer, (5)101

Low-Temperature Preservation of Foods and Living Matter, O.R. Fennema, W.D. Powrie & E.H. Marth, (5)104

Malnutrition: Its Causation and Control. Vols. 1 & 2. J.R.K. Robson, (8)95

The Measurement of Appearance. R.S. Hunter, ed., (6)90

Measurement Techniques for Quality Control of Agricultural Products. E.E. Finney Jr., (4)177

Meat Science. 2nd ed. R.A. Lawrie, (9)111

Menu Planning. E.F. Eckstein, (4)174

Naturliche, Natur-Identische und Synthetische Geschmacksstoffe und Deren Lebensmitelrechtliche Aspekte. (Natural, Natural-like and Synthetic Flavors and Legal Aspects of Their Use). W. Auerswald & B.M. Brandstetter, eds., (3)119

New Protein Foods. Vol. 1A. Technology. A.M. Altschul, ed., (11)106

Nutrition and Dietetic Foods. A.E. Bender, (7)82

Nutritional Problems in a Changing World. D. Hollingsworth & M. Russell, eds., (7)82

Nutritional Qualities of Fresh Fruits and Vegetables. P.L. White & N. Selvey, eds., (9)109

Nutritive Value of Triticale Protein. J.H. Hulse & E.M. Laing, (5)106

Operatii Si Utilaje in Industria Alimentara (Operations and Equipments in Food-Stuff Industry). Vol. 2. I. Rasenescu, (2)83

Phytochemistry. Vol. 1. The Process and Products of Photosynthesis. Vol. 2. Organic Metabolites. Vol. 3. Inorganic Elements and Special Groups of Chemicals. L.P. Miller, ed., (1)93

The Practice of Gas Chromatography. F.W. Rowland, (6)90

Processed Cheese Manufacture. A. Meyer, (5)107

Processed Meats. W.E. Kramlich, A.M. Pearson, & F.W. Tauber, (5)102

Progress in Refrigeration Science and Technology. Vols. 1, 2, 3, & 4. W.T. Pentzer, ed., (5)102

Radionuclides in Food. Committee on Food Protection, (2)80

The Ready Food System for Health Care Facilities. M.S. Finkert, (3)120

Recipe Index 1971. J. Forsman, ed., (11)105

Safety in Microbiology. D.A. Shapton & R.G. Board, eds., (2)81

Schlachtfette (Meat Animal Fats). (4)177

Schweizerisches Lebensmittelbuch (Swiss Handbook of Food Analysis). Vol. 2, Part 3. 5th ed., (5)101

Seed to Civilization: The Story of Man's Food. C.B. Heiser Jr., (3)118

Shortenings, Margarines and Food Oils. M.T. Gillies, ed., (7)84

Stale Food vs Fresh Food. R.S. Ford, (1)93

The Story of Food. I.D. Garard, (10)116

Sugar Confectionery and Chocolate Manufacture. R. Lees & B. Jackson, (4)174

Symposium: Processing Agricultural and Municipal Wastes. G.E. Inglett, ed., (2)80

Symposium: Sweeteners. G.E. Inglett, ed., (11)105

Symposium Über Frittürefette (Symposium on Deep-Frying Fats). W. Auerswald & B. Brandstetter, eds., (3)119

Systematic Layout Planning. 2nd ed. R. Muther, (5)106

Texture Measurements of Foods. A Kramer & A.S. Szczesniak, eds., (8)95

Tomato Paste and Other Tomato Products. 2nd ed. P.G. Goose & R. Binsted, (9)110

Toxic Constituents of Animal Foodstuffs. I.E. Liener, ed., (9)110

Toxicants Occurring Naturally in Foods. 2nd ed. Committee on Food Protection, Food and Nutrition Board, (8)94

Toxicity of Pure Foods. E.M. Boyd, (2)80

Triticale: First Man-Made Cereal. C.C. Tsen, ed., (11)105

27th Annual Technical Conference Transactions. American Society for Quality Control, (3)118

The Use of Fungi as a Food and in Food Processing. Part II. W.D. Gray, (6)98

The Utilisation of the Cook-Freeze System for School Meals. J. Millross, A. Speht, K. Holsworth & G. Glew, (4)173

Wärmephysikalische Konstanten Von Lebensmitteln und Halbfabrikaten (Temperature-Dependent Physical Constants of Foods and Food Ingredients. I.A. Tschubik & A.M. Maslow, (10)116

Wine and Must Analysis. M.A. Amerine & C.S. Ough, (8)94

REPRINTS of ARTICLES in *Food Technology*

Single reprints are **not** available from *Food Technology*—send requests directly to the author (address appears with article).

Quantity reprints can be ordered from IFT Reprint Department—minimum of 100 copies. Price schedule available upon request.

REPRINTS from *Journal of Food Science*

Single reprints are **not** available from *Journal of Food Science*—send requests directly to the senior author (address appears with article).

Quantity reprints can be ordered from IFT Reprint Department—minimum of 100 copies. Price schedule available upon request.

RESEARCH MANUSCRIPTS for *Journal of Food Science*

All Research manuscripts, associated material and requests for *Revised IFT Style Guide*—send to: *Dr. Bernard J. Liska, IFT Scientific Editor, P.O. Box 3067, West Lafayette, IN 47906 USA*

SUBSCRIPTION RATES for *Journal of Food Science*

To IFT Members: $10 per year ($5 to emeritus and student members)

To Non-Member Subscribers—per year, includes postage:
USA & Pan-American Union $30
All Other Destinations $35

Subscriptions accepted only on a calendar year basis. No refunds. Reduced rates for two- and three-year subscriptions.

Single copy or back issue price: $5
